By the end of this unit, you will learn how to use the internet responsibly and how the internet can be useful to all different demographics.

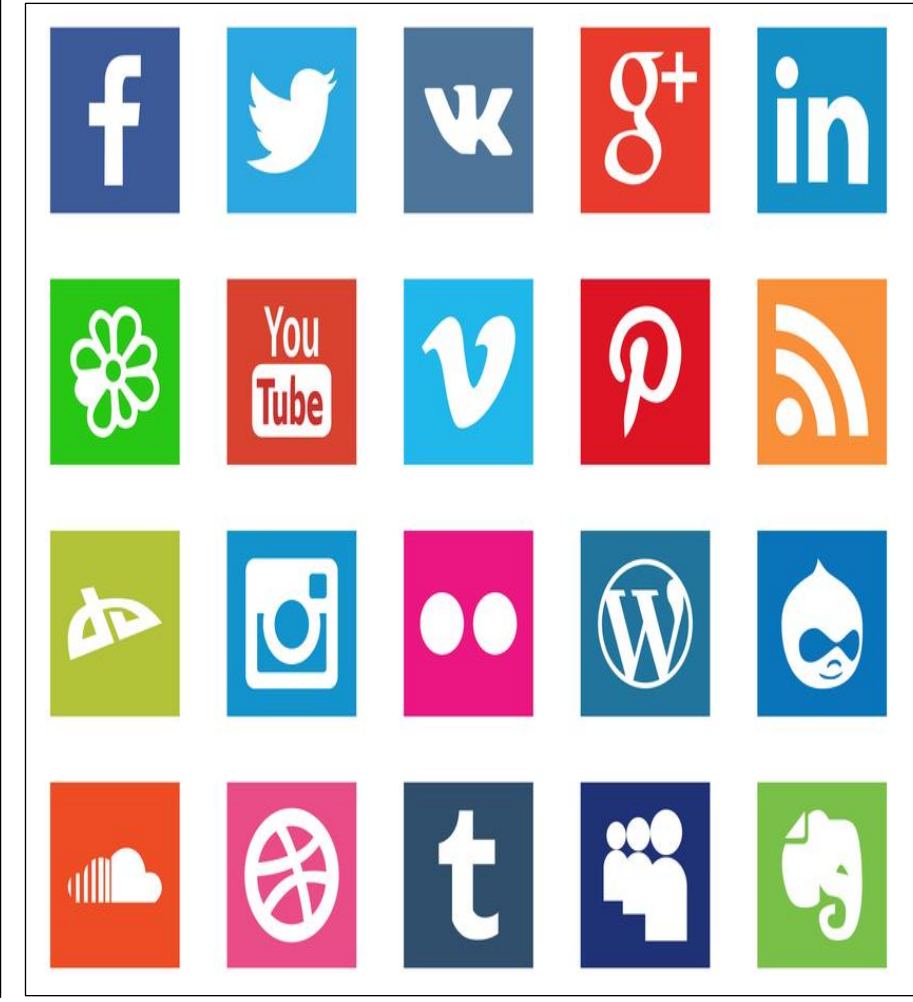

<u>Important information</u>	The world wide web was invented by a British computer scientist from
-------------------------------------	---

The world wide web was invented by Tim Berners-Lee who was a British computer scientist from London. Since then the internet has become a staple in most homes and offices around the world.

The internet has so many benefits to so many people. How do you use the internet?

The invention of the internet opened up a world of possibilities

The invention of the internet opened up a world of possibilities for so many to communicate with people all over the world. Initially, only a select few people would have enough money to have access to the internet however in the early 1990s the internet started to become a staple in more and more households.

Search engines made finding information so much easier than before. Google, ask Jeeves and Bing can provide access to millions of sources around a topic. Before search engines, if people wanted to find out information they would turn to books and the local library to find out which wasn't round the clock available information.

	Each lesson uses the following skills	Lesson	What will you learn	Learning Review
	What is the internet?	1	In this lesson you will learn what the internet is. What do we already know about the internet? What would we like to know about the internet?	
	What is the history of the internet?	2	In this lesson you will learn about how the internet was started. What were the initial uses for the internet. We will learn all about dial up internet and the progression of technology throughout the late 1900s.	
	How did the internet change people's lives?	3	We are going to find out the benefits of internet for people in different industries. How can businesses use the internet to grow?	
	How can I use the internet to find out information?	4	For this session we are going to find out how we can use the internet to answer questions we may have. We will learn what a search engine is and how to use this efficiently by changing the wording we use to perform our search.	
	How can I use the internet to suit my needs?	5	How many different things can we use the internet for? We will be looking at all of the endless possibilities on the internet and how different demographics will use the internet differently.	

Computing- The internet

By the end of this unit, you will learn how to use the internet responsibly and how the internet can be useful to all different demographics.
