

Money

Employment

Loan

Saving

Environment

Recycle

Power

Efficient

Energy

By the end of this unit, you will be able to understand where money comes from and how best to spend it. You will learn how to treat other people and the environment to keep this world a happy and safe place.

### Important information

You will begin this unit by looking at money. We will look at where money comes from and what are the best ways to use it. You will also learn the difference between a want and a need. Do we always absolutely need the things we want?

We will then look at how the things we do affect the people and the environment of our world and what we should do to make the world as safe and as happy for ourselves and those around us as we can. This can include:

- how kind and unkind behaviour can affect other,
- how to play and work co-operatively,
- what can harm the local and global environment,
- how ourselves and others can help care for it.

**RSE – Living in the Wider World****Year Two**

**By the end of this unit, you will be able to understand where money comes from and how best to spend it. You will learn how to treat other people and the environment to keep this world a happy and safe place.**

	Lesson Question	What you will learn	Learning Review
1	Where does money come from and what should we spend it on?	You will learn about where money comes from including from work, loans or gifts. You will learn about the best way to save your money.	
2	What is the difference between a want and a need?	You will learn the difference between a want and a need. You will sort different things that you can pay for between a want and a need. Do we always need the things we want?	
3	How does the way you behave affect other people?	You will learn the difference between kind and unkind behaviour. You will think about whether different scenarios are an appropriate way to behave, and what a better thing to do in that situation would be.	
4	How are human beings harming the environment?	You will look at different ways that people are harming the environment. Why do you think some of the things people are doing to the environment are wrong? Why do you think people do the anyway?	
5	What can you do to help the environment?	You will learn ways in which you, your family and your school can go the extra mile to help the environment. You will create your own checklist of ways you can change your habits to help.
